Inside Outside: Between Architecture and Landscape Anita Berrizbeitia, Linda Pollak

Inside Outside constructs a framework of interpretation for architecture and landscape architecture in order to disclose relations between them that are normally overlooked. Five operations—reciprocity, materiality, threshold, insertion, and infrastructure—each initiate an alternative way of looking at the construction and representation of relationships between architecture, landscape, city, and individuals. Twenty-four projects each contribute in a unique way to the definition of an operation.
