Richard Feynman, the renowned physicist, in his book QED, after discussing an unusual aspect of quantum physics stated: "... the more you see how strangely nature behaves, the harder it is to make a model that explains how even the simplest phenomenon actually works. So theoretical physics has given up on that."

Don Wortzman hasn't. His ground breaking Gyroverse Theory, simply and convincingly validates the twelve-dimensional helical construction of the universe. This surprising construct is able to explain most of the strange phenomena that have stymied the physics community for so long. It challenges and entertains while offering an understanding of how the universe actually works.

The common mechanism of the seven forces of nature, including three unrecognized ones, are described. Contrary to appearances none involve attraction; they all push rather than pull. The equivalence of the masses of gravity and inertia, a 300-year mystery, is solved. The big bang theory is described, without resorting to Inflation Theory. Additionally, particle spin, anti-matter, duality, quantum entanglement, non-simultaneity, and many other phenomena are simply explained. Nevertheless, from the inside, where we reside, the entire three-dimensional universe is on the surface of a four-dimensional sphere expanding outwardly at the speed of light. It enlarges by driving into new territory, rather than by the stretching of empty space. Consequently, matter is not energy, but is mass in motion at speed of light.

In short, the Gyroverse Theory combines quantum, relativity, and cosmology into a single unified theory.

From reader reviews:

Karen Strickland:

What do you think of book? It is just for students because they're still students or the idea for all people in the world, what the best subject for that? Just you can be answered for that query above. Every person has various personality and hobby for each and every other. Don't to be pressured someone or something that they don't wish do that. You must know how great and important the book The Gyroverse: The Hidden Structure of the Universe. All type of book can you see on many methods. You can look for the internet options or other social media.

Mary Case:

You are able to spend your free time to read this book this guide. This The Gyroverse: The Hidden Structure of the Universe is simple to create you can read it in the park, in the beach, train and also soon. If you did not have much space to bring typically the printed book, you can buy the e-book. It is make you simpler to read it. You can save typically the book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

John Folsom:

You can obtain this The Gyroverse: The Hidden Structure of the Universe by go to the bookstore or Mall. Only viewing or reviewing it could possibly to be your solve issue if you get difficulties for your knowledge. Kinds of this book are various. Not only by written or printed but can you enjoy this book by means of e-book. In the modern era including now, you just looking from your mobile phone and searching what your problem. Ellis Cook:

As a college student exactly feel bored in order to reading. If their teacher inquired them to go to the library or to make summary for some e-book, they are complained. Just very little students that has reading's heart and soul or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that examining is not important, boring and also can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this The Gyroverse: The Hidden Structure of the Universe can make you really feel more interested to read.
