Da Vinci's REAL Hidden Secrets: Number '26': Seminar Booklet for Enigmatic Number '26' L. A. Braun

Had Leonardo Da Vinci really hidden secrets in his art work? This seminar book based on the ORIGINAL 2013 book actually illustrated his REAL secret of the number '26' in Da Vinci's paintings (even in three of his most famous paintings - the Mona Lisa, the Madonna of the Rocks, and the Last Supper). Don't miss our updating Addendums! Although our search through Leonardo Da Vinci's works for embedded secrets had begun with the number '26,' it had then soon launched off into fresh and stirring discoveries. We'd found a number under a rose in the 'Madonna of the Stones' and that painting had pointed to a geometric circle with unique propensities—which we had christened as the 'PHI CIRCLE.' That wasn't the end though. We also discovered that Da Vinci had used 'rebus' to hide secrets within his works. 'Rebus' is an encoding technique where pictures are used to epitomize words, parts of words or number. This rebus had been hidden all over the Philosophers' Stone genre of texts. It wasn't long before we'd traced this same rebus throughout numerous other works in cultures spanning the globe. In this earlier book we had focused on the tantalizing Da Vinci secret of the number '26,' which he had hidden all over his works. This particular 2013 book was the initial groundbreaker on presenting different perspectives on the number '26.' Perfect for the overview--this enthralling spellbinder traces this hidden number '26' all over fine art, literature and structures throughout the history of human civilization. It is the most prolific and profound statement ever uttered by man, its use unmatched and unprecedented in our history. It is traced all the way back to the Greek and Egyptian gods. It can be traced via the goddesses of fertility through the oldest Egyptian Temples, the city of Petra and through the Trojan War artifacts. The collective thread of the mystery worship of the fertility goddess had seemed to morph into the various cultures and times, yet it remained the same. The common denominator was the hidden number '26.' This book reaches far back into the Trojan War to show that this same number '26' is sacred knowledge derived from that era or earlier. Indeed, as desirable as the coveted Helen of Troy, it appears to be the cause of the Trojan War. The number '26' is traced through the surge for world dominance by Alexander the Great and through the following surge by the Romans. It is traced through the history of the church from the reign of Justinian to the fall of Constantinople. The number '26' is traced through the Faust literature. Most astoundingly, this book illustrates how the hidden number '26' is still embedded in our contemporary culture! We believe that Da Vinci's secrets might ultimately lead the world to something big—like maybe the geometric shape required to finally resolve the String Theory equations. The number '26' had been intricately related to the PHI CIRCLE. We think this might point to String Theory. String Theory asserts that there are more space dimensions than just the ones that humans can see and that those dimensions are folded-in. Physicists and mathematicians who study String Theory are looking for a geometric shape of the folded-in dimensions so that they can better predict how the vibrations of those unseeable dimensions will affect experiments. Da Vinci may have provided that geometrical shape and propulsion in his portrayal of the PHI CIRCLE. Read it and decide for yourself! This book is based on the original 2013 'Number '26' book—except it was revamped (updated) and had the file format changed to accommodate the digital rights management. Read it today!
