[This] book's unfading preoccupation with social context, social processes, and social structures distinguishes itself and greatly contributes to the discourse in gerontology.

--The Gerontologist

This classic text, now in its fifth edition, is distinguished by its emphasis on social context, social processes, and social structures as part of a broader understanding of the sociology of aging and the life course. Presenting an objective view of the realities of aging, both positive and negative, the book examines aging from micro/macro, personal, community, societal, and global perspectives. This fifth edition describes important changes in the field of social gerontology and the growth in such topics as diversity, global aging, and the life course. It addresses major shifts in public policy, social institutions, and aging-related programming initiatives. There is a strong focus on the changing landscape of aging, particularly in regard to social engagement, employment and lifelong learning, enhanced health and independence, and livable communities for people of all ages. Additionally, the book includes new information on the Affordable Care Act and end-of-life issues.

The text is uniquely organized, featuring theoretical discussions in each chapter and topical essays between chapters. Critical thinking and review questions foster an in-depth understanding of the material.
