Protocol Guide for Neurofeedback Clinicians Susan F. Othmer - EEG Institute

In this Fifth Edition of the Protocol Guide, neurofeedback clinicians can learn about optimizing assessment and training with Infra-Low Frequency HD, Alpha-Theta and Synchrony neurofeedback - resulting in greater success with disorders ranging from autism to migraines to PTSD.

We continually refine our neurofeedback training and assessment methods based on optimization of clinical effects. With our new 2 channel Infra-Low HD application and new lower reward frequency range, we are now achieving consistently stronger training effects, especially for severe and chronic conditions.

From clinical practices to forward operating bases in Afghanistan, the Protocol Guide is the roadmap for the most effective work in neurofeedback.
