Handbook on Employment and the Elderly William H. Crown

This is a wide-ranging sourcebook filling a gap in the literature about employment policies and programs for older persons. The contributors represent the perspectives of the individual, the employer, and society-at-large. Their essays consider labor force characteristics; historical trends; key features of social security, pensions, and other retirement matters; age discrimination; economic, social, and political aspects related to employment and the elderly. A lengthy bibliography enhances the use of this major new reference tool for students, scholars, and practitioners in gerontology, social work, and business.
